

ABSTRACT OF THE DISCLOSURE

An all terrain vehicle (“ATV”) with a frame and at least three wheels suspended from the frame is disclosed. At least one of the wheels is a front wheel and at least one of the wheels is a rear wheel. The front wheel defines a front axis and the rear wheel defines a rear axis. The ATV has a power unit for driving at least one of the wheels disposed on the frame and a straddle-type seat disposed on the frame. The seat has a main seat portion for a driver and a secondary seat portion, rearward of the main portion, for a passenger. The ATV also has a rear rack, a majority of which is rearward of a rearward end of the secondary seat portion, and a steering member for steering at least one of the wheels.
